Safety Screens

Providing glass protection and emergency exit for security windows. Our hinged screens are ideal for windows who require maintenance, repairs and regular cleaning over fixed panel screens which cannot open. Safety screens are suitable for most window applications but specifically targeted for public buildings.

Mesh Features:

We guarantee 1MM 304 Stainless steel mesh

More than 90% of other products on the market only use .8MM mesh

Our screens provide 20% thicker mesh than alternative products available

Providing high security products.

Frame Features:

This product has a patent design, our mesh is bent 90 degrees doubling length within the frame and using our custom 3 point wedge system increases security from forced entry and eliminates electrolysis (metal on metal corrosion) by utilizing our parent design we can offer 10 year powder coating warranty* (T&C's apply)

Lever Features:

Engineered specifically to suit our safety screen product, providing more than one security feature.

Serrations on the frame secures the handle preventing manipulations from the outside but allowing smooth free egress from inside.

Will not self latch once open this assists with emergency services to access the building

Pricing and ETA:

Estimating \$450.00 inc GST installed , per square meter.

2 weeks made to order.
